- JWT Auth & State Management (Redux)
- CI/CD, Git & Deployment (Vercel)
- Performance Optimization & Bug Fixing
- Agile Teamwork & Client Delivery

CERTIFICATIONS

- Introduction to Software Engineering – Coursera
- Generative AI: Introduction and Applications – Coursera

ABOUT ME

Full Stack Developer with 2+ years of experience delivering 6+ live production websites for real clients. Proficient in React.js, Vue.js, and Next.js for frontend, with solid backend skills in Node.js, Express.js, and MongoDB. Built a complete ecommerce application with JWT authentication, Redux Toolkit state management, and CI/CD pipeline via GitHub Actions. Strong track record of API integration, bug fixing, performance optimization, and cross-browser compatible UI delivery across multiple simultaneous client projects. Passionate about writing clean, scalable code and continuously upskilling to stay aligned with modern development standards.

PROFESSIONAL EXPERIENCE

Associate Software Developer Feb 2025 – Present
NetInc Digital Services LLP – Ahmedabad

- Developed and maintained **multiple production-level web applications**, ensuring performance and responsiveness
- Built dynamic and reusable UI components using **React.js and Vue.js**
- Integrated frontend with backend systems using **REST APIs**, improving data handling and user experience
- Identified and resolved critical bugs, improving application stability and performance
- Collaborated with backend developers to implement **end-to-end features**
- Worked on **responsive design and cross-browser compatibility** across devices
- Managed multiple projects simultaneously and delivered within deadlines

React.JS Developer July 2022 – July 2023
Sharva InfoTech – Rajkot

- Developed reusable UI components using React.js
- Worked on **CRUD operations and API integration**
- Assisted in frontend feature development in real-world projects
- Gained experience in team-based development and project workflows

PROJECT EXPERIENCE (Live Websites)

Delivered 6+ live client websites at NetInc Digital Services – handling end-to-end UI development, REST API integration, performance optimization, and bug fixing. Also built a personal full-stack ecommerce project with JWT auth, Redux Toolkit, and GitHub Actions CI/CD pipeline deployed on Vercel.

- **Amanta** – Developed and launched the new website with responsive UI.
- **Calico Museum** – Worked on frontend development for the new website.
- **CUPDF** – UI implementation using Vue.js
- **MDI Gurgaon** – Website maintenance and layout fixes
- **Madhubhan Resort** – Led new website build and launch from scratch.
- **Elecon** – Website maintenance and layout fixes
